

RESEARCH MONTH AT ST. MICHAEL'S

Dear [NAME],

At St. Michael's, we are wrapping up Research Month, our annual showcase of game-changing work by our scientists and clinicians. This year, not surprisingly, the focus has been on fighting COVID-19 and its consequences. See below for some interesting facts about research at St. Michael's.

Here's to our wonderful scientists and all our donors who support them. Have a great weekend and stay healthy.

Yours sincerely,

Lili Litwin
President, St. Michael's Hospital Foundation

<p>62 Number of St. Michael's scientists leading COVID-19 research projects</p>	<p>74 Number of active COVID-19 research projects at St. Michael's Hospital</p>	<p>\$28,473,201 Total amount of COVID-19 research funding awarded to St. Michael's scientists</p>
<p>21 Number of government and charitable sources funding our COVID-19 research</p>	<p>110 Number of COVID-19 research articles in academic journals by St. Michael's scientists</p>	<p>10.5 Average impact factor for these articles (top journals' average is 6)</p>
<p>23 Percentage of initial funding from the federal government's COVID-19 Immunity Task Force for two of our scientists</p>	<p>15 Number of research projects focused on how COVID-19 affects disadvantaged populations</p>	<p>21 Number of COVID-19 clinical trials St. Michael's scientists have conducted in the last 9 months</p>

100
Percentage of St. Michael's scientists who expressed their gratitude to our donors for supporting their work fighting COVID-19
